

## **BID Landscaping Policy**

The Business Improvement District may install plantings with the following guidelines:

1. So as to contribute to the overall aesthetic of Downtown, the location must be within the BID, in the public right of way, and be highly visible.
2. Our staff horticulturist must design the landscape plan, including the selection and number of plants.
3. THE BID will purchase plants and planting materials. The property owner will be given an estimate of cost which would include plant material, soil, and other expenses. The property owner will then be billed after installation.
4. BID employees will install the planting.
5. The property owner will be responsible for watering the bed after installation. If the property owner fails to water or maintain the beds, the BID reserves the right to withdraw from the arrangement and remove all plants when they become unsightly.
